Xonicwave = Total IT Solutions

Based in San Diego, California, Xonicwave provides total IT solutions to businesses across the United States. Since our inception in 2004, we've helped more than 200 small to medium-sized companies solve their IT problems and maintain their networks with virtually no downtime. Our dedicated team has more than 80 years of combined computer and networking experience, and is committed to providing dependable and efficient solutions through excellent customer service. We have accumulated over 115,000 hours of experience.

We believe that our customers should be focused on running their businesses and not have to worry about the technical items. That's where we come in.

Technology is one of the most important aspects of every business regardless of size. It is critical to day-to-day operations as well as your strategic growth, to ensure you meet your goals and objectives. When you choose Xonicwave, you have professionals who design, build and manage networks for a vast array of industries – at your fingertips. Our services are defined by a proven methodology that utilizes our documentation abilities, technical expertise, communication skills and professional attitude.

Xonicwave takes pride in delivering responsive and timely solutions for all business and technology needs. We understand the importance of high quality IT services and solutions enable businesses to meet the economic and competitive challenges encountered in today's markets. Because we collaborate as a team, our clients are not just getting one consultant to take care of their network, but rather an entire team focused on taking their technology and business to the next level.

Our consulting engineers meet and exceed industry standards with certifications required by today's IT professional and are also certified by Xonicwave as well. This combined knowledge and experience empowers our engineers to manage a client's business and technology requirements from the get-go.

Services

Xonicwave offers a full range of services and programs to meet our client's needs. Whether it's an office relocation, the installation of a new network in your existing space, or our ongoing managed services program, we're there for you. We've worked with enough small to large businesses to understand their needs and desire for high quality solutions and high standard of client service.
